

NATURE CENTER -- Education & Appreciation

and other public use features

The nature center is built and landscaped to fit in with the surrounding natural features. The entrance to the island is inviting. These areas showcase locally native plants, reflecting the diversity of life now found throughout the island, and historically found throughout D.C.

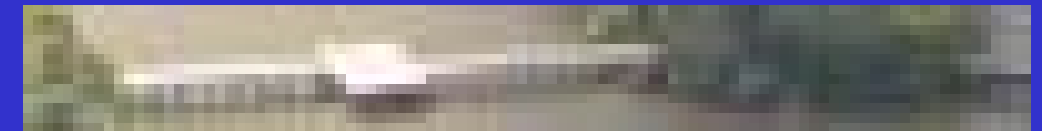

Canoe and kayak launch

Optional playground made completely from recycled products

Footbridges for recreational access (new bridges have been

Openings in the forest around the island provide scenic views of wildlife, the river, and wetlands.
